

## Press Release: Eyecademy Joins Atos Horizon

Prepared for:  
Publication

## **Eyecademy joins Atos Horizons SME programme, with an eye on enabling sustainability excellence for clients**

Eyecademy, a UK-based Business Intelligence (BI) and Artificial Intelligence (AI) innovator, is delighted to have been selected to join [Horizons](#), the pioneering programme from [Atos](#) UK and Ireland, that brings customers the best talent and solutions from the UK and Ireland SME community.

Headquartered in Glasgow with employees across the UK, Eyecademy provides unique solutions and insights which enable organisations to overcome some of the biggest challenges businesses face today through better-informed decisions using their existing data. Whether the goal is net zero emissions, modernisation or asset optimisation, our skilled people deliver client-centric data services that harness the full power of data analytics, visualisation, data science and software development, from digital twins to robotic process automation (RPA).

Amongst clients which include NHS Scotland, BP and Babcock, Eyecademy has both recently deployed an RPA solution for a large UK company Wright Health Group Limited that effected savings of 3% on operational costs, and developed an end-to-end AI solution which offers bespoke mental health support for citizens. We are now proudly collaborating with Atos to deliver process automation and data science projects across Public Sector, Defence, Healthcare and Utilities.

*"We are delighted to have been selected onto the SME Horizons programme. During the process, our team have been excited working alongside Atos and are looking forward to further developing this relationship. Atos share our enthusiasm for customer innovation enabling full value from data."*

*Michael McMeekin - Eyecademy*

*"Horizons is about identifying innovative solutions that will be of interest to our Public Sector and Defence clients in the UK and we therefore look forward to introducing Eyecademy to our clients."*

Nikki Kelly, SVP Public Sector & Defence Northern Europe, Atos
